# PRODUCT RANGE

FARMET AGRICULTURAL MACHINERY

## 2020

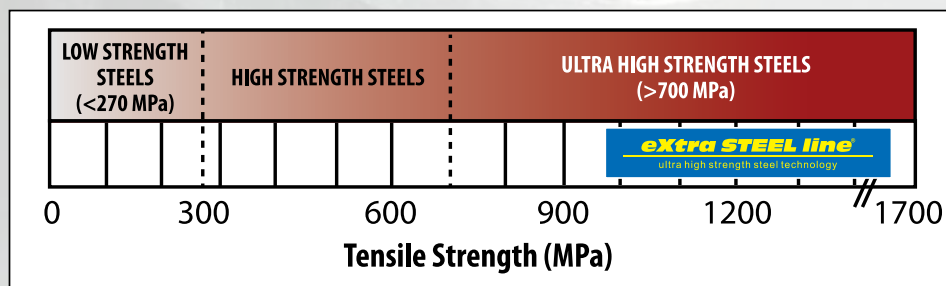

**eXtra STEEL line**<sup>®</sup>

ultra high strength steel technology

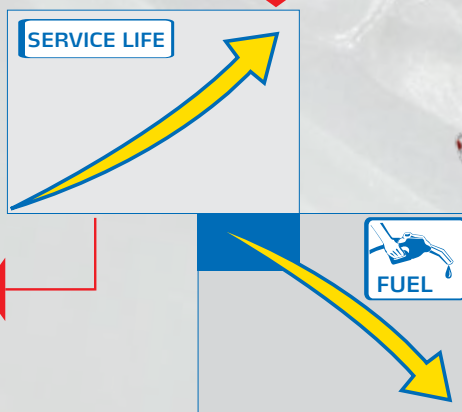

# eXtra STEEL line®

ultra high strength steel technology

## Frame from high-strength steel

- 3 times higher strength and high flexibility of construction
- Significantly lower weight of machine
- Used on frame, working units and extremely burdened parts
- For extended service life of machine
- Fuel economy

# CAMBRIDGE

rollers

Cambridge rollers are especially suitable for **additional pre-sowing soil processing, restoration of soil capillarity, crumbling of clods and surface levelling**. They are also suitable for the soil processing after sowing – more uniform seed emergence and acceleration of vegetation.

**8–15 km/h**  
**5–9 mph**

Ø 500 mm (20 in)

1

1. Fine after-sowing soil processing – crushing of clods by rolling.

**eXtra STEEL line®**  
ultra high strength steel technology

- Cambridge rollers are designed for **additional pre-sowing soil processing**, especially in heavy dry conditions.
- Cambridge rollers are used for **levelling of the surface, crumbling of clods and restoration of soil capillarity**. The machine can also be used after sowing. Working operation performed in this way increases uniformity of seed emergence and subsequently acceleration of vegetation.

Technical parameters	Units	Cambridge CV 6	Cambridge CV 9
Working width	mm / ft	6000 / 19.7	9000 / 29.5
Transport width	mm / ft	2400 / 7.9	2400 / 7.9
Transport height	mm / ft	1600 / 4.5	1600 / 4.5
Total machine length	mm / ft	4100 / 13.5	6800 / 22.3
Number of segments (smooth/geared)	pcs	58 / 55	88 / 83
Working performance	ha/h (ac/h)	6.0 (15)	9.0 (22)
Towing vehicle	kW / HP	75 / 100	90 / 125
Machine weight	kg / lb.	2700 / 5960	3600 / 7940
